

Gram Oorja Solutions Private Limited

Gram Oorja Solutions Private Limited acts as a catalyst in commercializing on-the-ground viable Renewable Energy solutions with focus on the rural sector. It believes that rural energy needs can be fulfilled from local resources. This will lower the dependence of rural India on the large centralized energy systems making them self-sufficient with respect to their own energy needs.

Projects

Renewable energy as a service to Rural Computer Center installed in Sonari, Sitapur, Uttar Pradesh.

Renewable energy based mini-grid for remote and off-grid villages, installed in Darewadi, Junnar, Maharashtra and at Viral, Joida, Karnataka.

Solar water pumps for domestic and irrigation installed at 4 villages in Jawhar, and at Uttan Krishi Sanshodhan Sanstha, Thane, Maharashtra.

Biogas plant for process heating or power generation installed at ashram in Tamilnadu, dairy in Rajasthan and biogas grid for community in village in Pune district, Maharashtra.

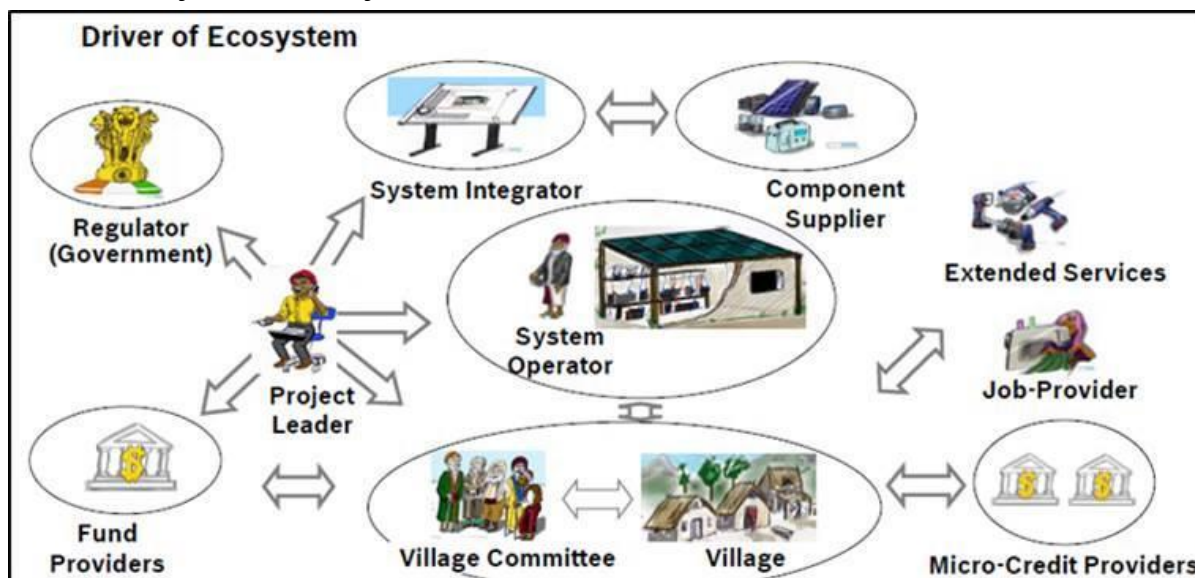

Renewable energy based small systems for educational institutes, offices in rural areas installed at Pragati Pratisthan, Sadhana Village, Keshav Srushti Karyalaya in Maharashtra.

Consulting assignments including energy needs assessment in remote villages from different states, done for Shakti Foundation, Prayas Energy Group.

Role of Gram Oorja – as a Project Leader

Gram Oorja - Key Strengths

- Market interaction across India - villages, plantations, ashrams, businesses, etc. enabled by relationships with grassroots networks in these areas
- Team of employees and consultants - people familiar with end to end process from surveys , project execution to operations and maintenance
- Willingness to work in geographically and politically difficult markets
- Relationships with key stakeholders - NGOs/Government bodies such as MNRE, IREDA, NABARD etc
- Design and implementation capabilities in different renewable technologies suitable for off-grid solutions especially Solar PV and Biogas.
